

Title: Environmental monitoring

Subtitle:: "Safeguarding Our Planet"

Presenter:Thanush T

Date: 09/10/2023

# Introduction

Briefly introduce the importance of environmental monitoring.

Highlight the impact of human activities on the environment.

Mention the goal of the presentation.

Explain its role in assessing environmental health.

Use visuals like icons or images of various environments (land, air, water).

# Objectives of environmental monitoring

Detecting and analyzing environmental changes.

Assessing the impact of human activities.

Protecting human health.

Informing policy and decision-making..

# Environmental monitoring with IoT.

Define environmental monitoring with IoT.

Explain how IoT sensors and devices are used to collect and transmit environmental data.

Include a simple diagram illustrating IoT sensor deployment.

# IIOT sensors and devices

Discuss various types of IIOT sensors and devices used in environmental monitoring, such as:

Air quality sensors

Soil moisture sensors

Water quality sensors

Weather stations

## Conclusion

Express appreciation to the audience for their time.

Provide contact information for inquiries or collaborations.

Use visuals, charts, and graphics to make the presentation engaging and easier to understand. Keep text concise and use bullet points for key information. Practice your presentation to ensure clarity and confidence in your delivery.
